
Akmal Muhammed

Offensive Security Consultant | Red Team | Adversary Emulation | Cloud Security

Doha, Qatar | +974 7401 5001 | akmalmuhammed93@gmail.com

linkedin.com/in/akmal-muhammed-m-k | akmalmuhammed.github.io/resume

Professional Summary

Offensive security consultant with 5 years across cybersecurity, analytics, and consulting, including recent critical infrastructure engagements in Qatar. Specializes in red team operations, adversary emulation, attack simulation, purple team validation, detection engineering, and cloud security assessment across enterprise, web, mobile, OT/IoT, and cloud environments.

- Delivered red team, VAPT, adversary emulation, and Mandiant Security Validation work across critical infrastructure environments.
- Built and tuned 200+ KQL detections and hunting workflows across Microsoft Sentinel, Cortex XDR/XSOAR, SentinelOne, Defender XDR, and Darktrace.
- Developed production security tools including an autonomous agentic pentest platform and MXLens phishing intelligence SaaS.

Professional Experience

Security Consultant | INTALEQ Technology & Consulting Services

Client: Aspire Zone Foundation | Doha, Qatar | Feb 2024 - Present

- Delivered red team and VAPT engagements across enterprise, web, mobile, wireless, OT/IoT, and cloud environments, translating attack paths into remediation plans.
- Authored adversary emulation playbooks for GCC-region threat actors including APT39, MuddyWater, Stealth Falcon, and APT34 using MITRE ATT&CK mapping.
- Ran quarterly Mandiant Security Validation exercises across endpoint, email, network, and cloud controls using 200+ ATT&CK-mapped techniques.
- Performed controlled payload, EDR, lateral movement, privilege escalation, and Active Directory attack-path testing within approved engagement rules.
- Validated Azure and GCP security posture using Prisma Cloud and Microsoft Defender for Cloud, including identity, IAM, service-principal, and conditional-access review.
- Built and tuned 200+ KQL detections and threat-hunting workflows across Microsoft Sentinel, Cortex XDR/XSOAR, SentinelOne, Defender XDR, and Darktrace.
- Produced technical evidence packs, executive summaries, C-level briefings, and engagement-to-remediation closure materials.

Platforms: Cobalt Strike, Core Impact, Tenable, Burp Suite Pro, Microsoft Sentinel, Cortex XDR/XSOAR, SentinelOne, Defender XDR, Darktrace, Prisma Cloud, KQL, Python

Senior Analyst - Cybersecurity & Analytics | Interactive Avenues (IPG) | WPP

Mumbai, India | Mar 2023 - Dec 2023

- Conducted web application security assessments identifying XSS, SQL injection, IDOR, malicious JavaScript injection, and authentication weaknesses.
- Performed VAPT across enterprise application and network environments with technical evidence and remediation guidance for client teams.

-
- Reverse-engineered malicious JavaScript injections to determine payload behavior, delivery mechanism, and attacker objective.
 - Built Python anomaly-detection workflows for traffic-pattern analysis, bot activity identification, and third-party script exposure review.
 - Implemented role-based access controls for BI/reporting platforms and triaged vulnerability-scan results into prioritized remediation guidance.

Platforms: Web AppSec, VAPT, Python, JavaScript analysis, RBAC, client reporting

Executive - Analytics and Reporting | Group M

Bengaluru, India | Jun 2021 - Jun 2023

- Built Power BI, SQL, and Salesforce Datorama reporting workflows for enterprise clients with recurring data validation and delivery automation.
- Designed least-privilege access models across multi-tenant reporting infrastructure, strengthening access-control and privilege-analysis foundations.
- Managed stakeholder communication and project delivery across cross-functional teams, building client advisory and executive reporting habits.

Platforms: Power BI, SQL, Salesforce Datorama, access control, stakeholder delivery

Selected Projects

Autonomous Agentic Pentest and Red Team Platform | Consulting-scale external assessment platform

AI-powered platform running five isolated workflows for OSINT, enumeration, evidence capture, controlled validation, and technical/executive report generation with human approval gates.

Stack: Python, FastAPI, Docker, GCP, LLM orchestration

MXLens | Phishing intelligence SaaS

B2B platform with 11 detection modules for sender spoofing, reply-to mismatch, typosquatting, QR phishing, open redirects, credential forms, DMARC/SPF/DKIM, and phishing intent scoring.

Stack: Next.js, TypeScript, Prisma, PostgreSQL, Stripe, WebAssembly

Cloud Attack Path and Control Validation | Azure, GCP, identity, and posture review

Assessment track for cloud identity paths, service principals, conditional access, IAM exposure, and posture-control coverage using cloud security tooling.

Stack: GCP, Azure/Entra ID, Prisma Cloud, Microsoft Defender for Cloud

SecUtil / CyberTools Hub | Browser-native security utilities

Zero-footprint WebAssembly security utility surface for encoding, cryptography, hash checks, IOC helpers, and payload string inspection in restricted environments.

Stack: WebAssembly, JavaScript, client-side security tooling

Technical Skills

Red / Purple Team: Red team assessments, adversary emulation, attack simulation, controlled PoC validation, detection-gap analysis

Payloads and EDR: Python, C, Nim, shellcode loaders, process injection, direct syscall concepts, AMSI/ETW concepts, sleep masking

Lateral Movement and PrivEsc: BloodHound, Impacket, Mimikatz, Rubeus, Kerberoasting, delegation abuse, Windows privilege escalation

Web and Mobile AppSec: OWASP Top 10, Burp Suite Professional, API security, Fortra SAST/DAST, Frida, objection

Cloud Security: GCP posture review, Azure/Entra ID attack paths, AWS IAM enumeration, Prisma Cloud, Microsoft Defender for Cloud

Threat Intelligence: MITRE ATT&CK, ATT&CK for ICS, APT profiling, Kaspersky TIP, VirusTotal Enterprise, Mandiant Security Validation

SIEM / SOAR / IR: Microsoft Sentinel, KQL, Cortex XDR/XSOAR, SentinelOne, Defender XDR, Darktrace, XSOAR playbooks

Tool Development: Python, FastAPI, Next.js, TypeScript, Docker, PostgreSQL, WebAssembly, LLM orchestration

Certifications

- Microsoft SC-200 - Security Operations Analyst
- CyberSec First Responder - Threat Detection and Response
- Microsoft SC-100 - Cybersecurity Architect
- IBM Data Analyst - Data Analyst Specialization
- Forcepoint DLP Admin

-
- Darktrace Admin
 - Cortex XSOAR Admin
 - Pursuing: ISC2 CCSP - Certified Cloud Security Professional
 - Pursuing: OSCP - OffSec Certified Professional

Education

B.Tech - Computer Science and Engineering

National Institute of Technology Puducherry, India
